Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

College Management Admission System

- Developed a web-based application to streamline the college admission process using HTML & CSS, JavaScript, PHP, Node.js, and MySQL.
- The main principle behind the need for a college admission system is to simplify the supervision of educational institutes.
- It can handle students' data, ensuring a well-structured database that meets practical needs.
- Provides security at the product level as well as the user level.
